

Redesigning our future

A National Environmental Summit
for Students 14-17 Years Old

July 9-13, 2024
Catawba College
Center for the Environment
Salisbury, NC

*Empowering students to discover how to create
the change needed for a sustainable future.*

Students will have the opportunity to:

- Strengthen creative and collaborative thinking skills
- Delve into individual interests to imagine innovative solutions to environmental challenges
- Work with college professors and environmental leaders
- Build relationships with like-minded individuals
- Explore the 189-acre Fred Stanback, Jr. Ecological Preserve
- Experience college life for a week

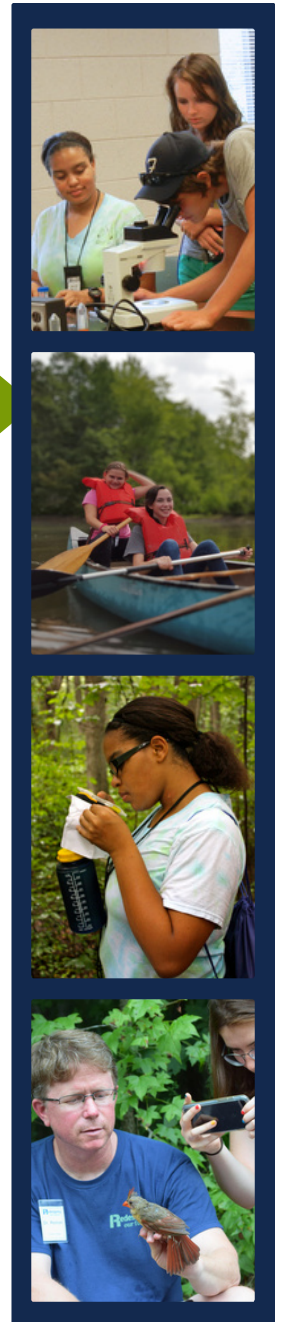

Students will meet:

Dr. Baker Perry, National Geographic Explorer, who leads climate science research on the world's highest peaks, finding more life than ever expected!
